

# MWH Constructors Chooses GSI for Their E1 Upgrade/Tools Release/Architecture Redesign

## The Company

MWH Constructors engages in strategic consulting, technical engineering, environmental and construction services for clients in multiple industries. They are responsible for some of the largest and most technically advanced wet infrastructure, hydropower, mining and transportation projects for municipalities, governments and multi-national private corporations throughout the world.

MWH Constructors employs a staff of 8,000 with 180 global offices located in 35 countries across six continents and is headquartered in Broomfield, CO. Its heritage dates back to 1820 when the Ames Crosta Company was founded and later acquired by Biwater Services, Ltd. Biwater Services (now called MWH Treatment) was acquired by MWH in 2010.

*“We were most impressed with GSI’s extensive resources, their responsiveness and reliability. GSI was able to rapidly and seamlessly implement the latest release of JD Edwards with minimal disruption to our business and delivered the project on schedule.”*

Case Study: **MWH Constructors**

## COMPANY SNAPSHOT

**Company:** MWH Constructors

**Headquarters:** Broomfield, CO, USA

**Industry:** Construction

**GSI Applications:** JD Edwards EnterpriseOne  
— Financials  
— Real Estate  
Platform – iSeries  
Windows WebLogic on 10 VMs  
Database – DB2

## The Issues

Since software support was set to expire, MWH planned to upgrade to the latest release of JD Edwards EnterpriseOne. As part of the upgrade process, they also wanted to remove many customized objects, improve various interfaces, move to the latest tools release and upgrade their existing hardware and related infrastructure.

As part of the upgrade plan, MWH also wanted to create a platform for business process improvement and system optimization. The new platform would allow for an integrated global workforce, simplify new country implementations (M&A) and incorporate employee and requisition self-service features of JD Edwards.

Before moving forward, MWH needed to identify a highly experienced partner that could assist them with their aggressive plans.

## The Results

After evaluating several vendors, MWH made the decision to move forward with GSI, Inc. based on their extensive resources, vast experience and knowledge of JD Edwards. GSI's innovative plan also included a complete knowledge transfer to the MWH staff. Most importantly, instead of proposing a retrofit of the existing environment, GSI proposed a complete architecture redesign that would best position MWH for future growth.

Charlene McCaslin, IT – PMO Manager with MWH was very pleased with the results achieved by GSI. "We were most impressed with GSI's extensive resources, their responsiveness and reliability. GSI was able to rapidly and seamlessly implement the latest release of JD Edwards with minimal disruption to our business and delivered the project on schedule. GSI's innovative approach also allowed for a complete knowledge transfer to our staff during the upgrade."
