

Cybersecurity Services

GSI's Cybersecurity Services

Companies face a multitude of cybersecurity threats, including ransomware, malware, phishing, data breaches, insider threats, supply chain attacks, APT, zero-day exploits, and more. These threats can result in major financial losses, disruption to your business, reputational damage, and compromised data. It is vital for organizations to remain proactive with the ever-evolving threat landscape to effectively protect valuable assets and maintain business continuity.

GSI's cybersecurity services encompass a wide range of solutions and services aimed at protecting your applications, databases, networks, endpoints, mobile, IoT, cloud infrastructure, identity, intellectual property, and most importantly your business from unauthorized access, attacks, and breaches.

Take the first step today with a free consultation with one of our cybersecurity experts. We can also schedule a complementary external vulnerability assessment and report with our findings.

Cybersecurity Solutions & Services:

- vCISO Services
- Managed SIEM
- Assessments
- Application Security Testing
- Cybersecurity Awareness Training
- Security Rating / Vendor Risk Management
- Zero Trust Security Solutions

Cybersecurity Assessments

GSI recognizes the utmost significance of cybersecurity in the modern digital world. This is why we offer a comprehensive array of customized cybersecurity assessments that cater to your specific requirements.

If you have concerns about potential system vulnerabilities, endeavor to ensure your organization's compliance with industry standards, assess your cybersecurity risks, or evaluate the security stance of your external vendors, partners, and suppliers, GSI is here to provide unwavering support throughout the entire process.

Take the crucial first step in safeguarding your business through our complimentary external vulnerability assessment and consultation. Acquire invaluable insights into your digital security and strengthen your defenses. Seize control of your cybersecurity posture without delay.

vCISO Services

For small-to-medium-sized businesses (SMBs), hiring a full-time Chief Information Security Officer (CISO) can be a costly challenge. But with GSI's virtual Chief Information Security Officer (vCISO) services, organizations can access specialized expertise and experience in cybersecurity at a fraction of the cost. Our on-demand resources (vCISO as a Service) provide cost-effective solutions that bridge the gap for SMBs lacking in-house cybersecurity expertise. Our vCISO services include the following:

- Security strategy
- Security policies, guidelines, and standards
- Meeting compliance requirements
- Risk Management
- Selecting security tools, solutions, and managed services partners
- Incident response (IR) readiness
- KPIs and metrics
- Recruitment and mentoring of staff

Security Information and Event Management (SIEM) Managed Service

Our Security Information and Event Management (SIEM) managed service is equipped with a state-of-the-art Security Operations Center, providing a centralized hub for seamless log management, rapid threat detection, incident response support, regulatory compliance guidance, and actionable insights and reporting.

With our SIEM solution and SOC services at your fingertips, you can effortlessly oversee security events, detect and neutralize potential threats, maintain compliance, and make informed decisions to enhance your organization's security posture.

Application Security Platform for SDLC

GSI provides comprehensive solutions and services to help organizations secure their software applications. These application security testing solutions help identify and address application vulnerabilities, promoting a proactive and secure software development process.

- Securing Entire Software Development Lifecycle (SDLC)
- Build Developer Security Competence
- Protect Software Supply Chain
- Manage Web App Attack Surface
- Secure Cloud Development

Zero Trust Security Solutions

GSI's Zero Trust cybersecurity solutions and services offer a unified approach to protecting applications, data, users, devices, and networks against cybersecurity threats (ransomware, malware, zero-day, and more) and exploiting vulnerabilities. Solutions and services include:

- Application Whitelisting /Allowlisting
- Ringfencing
- Storage Control
- Elevation Control
- Network Access Control
- Privileged Access Management

Cybersecurity Ratings/Vendor Risk Management

GSI provides security rating tools and services to assess and continuously monitor your organization's cybersecurity posture and security rating. We can also provide remediation services.

Using our vendor risk management tools, you can safeguard your supply chain by continually assessing and monitoring the cybersecurity posture of vendors and partners in your ecosystem.

Cybersecurity Awareness Training Solutions

The alarming fact from the latest Verizon Data Breach Awareness Report is that Business Email Compromises (BECs) cost an average of \$50,000. Promptly detecting, responding to, and preventing such threats is crucial for protecting your organization. GSI specializes in state-of-the-art cybersecurity awareness training and simulated phishing solutions to educate your users and safeguard against these evolving threats.

Our services include interactive training modules, immersive phishing simulations, assessments, compliance management tools, swift incident response, detailed reporting/analytics, and customizable options. By integrating training, simulations, and assessments, GSI helps elevate your organization's security posture, educate employees about cybersecurity, and ensure industry compliance.

What Makes GSI's Cybersecurity Services Different?
