- Security Performance Management
- Exposure Management
- Performance Management
- Risk Assessment
- Vendor Risk Assessment

Bitsight Cybersecurity Ratings & Vendor Risk Management Solutions

Security Performance Management

Bitsight Security Performance Management (SPM) provides CISOs with powerful analytics to effectively address cyber risk governance and exposure management while confidently demonstrating program performance. Risk leaders rely on SPM to safeguard their business from threats, achieve consistent performance, make informed decisions, and provide stakeholders with assurance of program effectiveness.

- Managing external attack surfaces
- Enhancing governance and analytics
- Quantifying cyber risk

Exposure Management

Manage the expanding landscape of potential cyber-attacks. While your attack surface may be increasing, your cyber risk doesn't have to. Stay ahead of the game by proactively addressing vulnerabilities and resolving immediate issues, ensuring that only the individuals you authorize have access to your valuable data. Gain a deep understanding of your most susceptible areas and take action to mitigate them. Discover new assets and their impact on your organization, allowing you to make informed decisions and protect your critical information effectively. Direct your efforts towards a stronger defense and enhanced security. By focusing on specific activities tailored to your unique needs, you can fortify your cybersecurity measures and reduce the likelihood of successful attacks.

Performance Management

Gain insights into the effectiveness of your operations and enhance areas that require improvement. No longer rely on superficial metrics. Dive deep into your performance using governance analytics. Set measurable targets, align them with desired outcomes, and track progress over time to enhance your performance continually.

Understand your performance levels and the reasons behind them. Achieve consistent performance across your entire organization. Monitor and evaluate your performance trends to ensure continuous growth and success.

Risk Assessment

Make informed decisions about your cyber risk. Understand how to effectively manage your cyber risk by choosing to accept, mitigate, or transfer it. Assess your financial exposure to cyber risk to ensure you make the right choices based on your current situation.

Customize your cyber insurance to match your risk appetite. Communicate cybersecurity in a language that resonates with the board. Allocate resources to what truly matters, prioritizing the areas that require the most attention.

Vendor Risk Management

Gain complete control over risk management throughout your digital supply chain. With Bitsight Third-Party Risk Management, empower your risk leaders to manage every aspect of your digital ecosystem effectively. Streamline vendor assessments, proactively monitor for hidden vulnerabilities, and take decisive action to mitigate exposure. Move swiftly and confidently in protecting your organization from potential threats.
