

# JD Edwards EnterpriseOne

## Designed to meet the challenging demands of the modern business world

### JD Edwards ERP Overview

JD Edwards Software, commonly known as JDE, is a robust, feature-rich integrated enterprise resource planning ERP software application suite. With its powerful features and functionality, JDE is built to address the needs of a multitude of industries, providing greater visibility, efficiency, and productivity. Currently, the latest version of the software is Oracle JD Edwards EnterpriseOne 9.2.

As one of the leading ERP systems with numerous JD Edwards modules, Oracle JDE Software combines business value, advanced technology, a great user experience, and deep industry expertise into a scalable business solution with a low total cost of ownership (TCO).

GSI offers a full complement of JD Edwards consulting services to support all of your Oracle JDE needs and is an authorized JD Edwards Reseller.

With its powerful features and functionality, JDE is built to address the needs of a multitude of industries, providing greater visibility, efficiency, and productivity.

# Why JD Edwards Programs?

## Over 80 Application Modules

JDE has over 80 fully integrated application modules. These include financials, manufacturing, supply chain, fixed assets, customer relationship management (CRM), human capital management, sales, order management, and a whole lot more.

## Over 7,000 customers

Over 7,000 companies across the globe use JD Edwards EnterpriseOne to run their businesses.

## Industry Focus

A variety of industries use JDE Software for their ERP system to run their business, including Manufacturing, Distribution, Consumer Packaged Goods, AEC, Life Sciences, Energy, and more.

## Platform-Agnostic

EnterpriseOne can be deployed on a variety of platforms with more choices of databases, operating systems, web servers, and hardware so you can build and expand your IT solution to meet business requirements.

## Advanced Functionality

JD Edwards provides an array of integrated features to streamline your business, including One View Reporting, UX One, UDO's, Orchestrations, cloud options, mobile applications, and more.

## Continuous Delivery

Oracle JDE uses an innovative continuous delivery model to keep you current with the latest JD Edwards application enhancements and tools releases in Oracle JD Edwards EnterpriseOne.

## What is the History of Oracle JDE Software?

### The Beginning of ERP JD Edwards

In 1977, Jack Thompson (J), Dan Gregory (D), and Ed McVaney (E) founded JD Edwards (JDE) in Denver, Colorado. On a tight budget, they started the business in a small office with one piece of equipment, a copy machine, for which they paid \$105/month. Initially, the company focused on developing accounting software based on green screens as well as related services.

Soon, they were developing ERP software to streamline the supply chain for IBM minicomputers (System/34, System/36, and eventually Systems/38). In the mid-1980's they switched to the AS/400, with their main software called JDE World Software.

## JDE Software: Through The Years

In 1996, they launched a client-server version of the software called OneWorld, which was platform-agnostic and had a GUI interface. The system could now be deployed on multiple platforms (servers, hardware, OS, database).

As they continued to grow, they went public in 1997 (NASDAQ – JDEC) with Ed McVane as the CEO. In 2000, they launched OneWorld Xe. In 2003, PeopleSoft acquired JDE and rebranded from OneWorld Xe to EnterpriseOne. Soon after, Oracle came knocking and completed their acquisition of Peoplesoft in late 2004.

## Oracle JD Edwards: Today

To this day, it continues to thrive under the Oracle umbrella, providing both EnterpriseOne and World Software to medium-sized businesses in many industries for both JD Edwards versions. The majority of companies are currently using EnterpriseOne, its web-based solution, which can be deployed on-premises or in the cloud.
